SUPERTAC PROMOCIONAL

General Description:

commercial grade reflective sheeting for temporary sign with 3years outdoor service life, it is a sort of encapsulated reflective material that seals by a resin coat the reflective layer resulted from the thin continuous layer of glass beads and the metal plating film. It strongly resists the deteriorating effect of weathering and also renders high reflectivity especially at night and bad weather.

ILLUSTRATION:

THICKNESS: 190 – 240 Micron (Self-adhesive film)
320 – 375 Micron (Total thickness)

ADHESIVE TECHNICAL DATA:

adhesive values:

Peel Adhesion: (20 min)	19.0 N/25 mm
Peel Adhesion (24 h)	28.0 N/25 mm
Quick Stick	17.0 N/25 mm
Shear (RT)	> 15 h

Other related information:

Outdoor Durability –For 3 years when properly processed and applied.

Standard size – width: 48 inches(1.22m); length: 50yards(45.7m).

Usage – Most suitable for construction work zone signs, temporary traffic signage applications, and caution tapes.

Colors Availability –including but not limited - white, yellow, red, green, blue.

Type of Adhesive: Pressure Sensitive.
